

Which side carries the $1/N_s$ residual? (diagnostic, 261012 sec. 3.10; $L_{\text{eff,true}} = L_0 - 2r - t/2$)

$\eta = 0.100$: against the bulk KR stiffness

$\eta = \pi/8$: against the bulk KR stiffness

$\eta = 0.100$: against $KR \times (1 + b/H)^2$ (measured wall shift removed)

$\eta = \pi/8$: against $KR \times (1 + b/H)^2$ (measured wall shift removed)
