

TEST A, interim 2026-09-13 11:02 HST: c_s against record length, finished trajectories only (80 of 600)
 masses with ≥ 3 finished seeds: $L0 = 20$: [500, 900, 1000]; $L0 = 7.5$: [1000]. Error bar on the Román mean = 1σ scatter of per-mass c_s .

$L0 = 20 \sigma$ ($\eta = 0.196$)

$L0 = 7.5 \sigma$ ($\eta = 0.524$)
